

GreenArc 500 Bilge & Sludge

REDUCE SLUDGE DELIVERY

By separating the water from the sludge in the sludge tank, you will reduce the volume of sludge deliveries to port. You will save a lot of money with this reduction.

STOP OWS PROBLEMS

Because the bilge tank is too dirty, the OWS has daily operational problems. By using the pre-separator, GreenArc 500, you will avoid the daily the OWS problems.

SUSTAINABILITY

GreenArc complies with UN's Sustainable Development goals no 9, 12, 13 and 14.

GreenArc has been approved as a sludge reduction by Dnv-Gl.

FACTS

- GreenArc has no filters
- GreenArc has only two moving parts
- GreenArc requires no monthly crew maintenance
- Low energy consumption
- Reduces fire hazard in engine room
- No oil smell in engine room

WHAT OTHERS SAY

- "Very low maintenance costs"
- "Can run dry for hours"
- "Very easy to use"
- "The system is very reliable"
- "Can now pump water overboard"
