

GreenArc 500 Bilge

CLEAN BILGE WATER

By pumping the bilge water into the GreenArc 500 Bilge pre separator, you separate the oil and dirt from the bilge water, so there is no visible oil in the bilge water.

NO SLUDGE SUCTION

The ship NEVER again needs sludge suction from land for cleaning the engine room. GreenArc manages this task 24/7, with very little maintenance cost.

SUSTAINABILITY

GreenArc complies with UN's Sustainable Development goals no 9, 12, 13 and 14.

GreenArc has been approved as a sludge reduction by Dnv-Gl.

FACTS

- Reduces CO2 by 50%, with less transport
- GreenArc has only two moving parts
- GreenArc requires no monthly crew maintenance
- Low energy consumption
- Dnv-Gl approved as Sludge Reduction
- GreenArc has no filters

WHAT OTHERS SAY

- "Very low maintenance costs"
- "Can run dry for hours"
- "Very easy to use"
- "The system is very reliable"
- "Can now pump water overboard"
